1 OF 1 WEARABLE ART
MADE FROM SUSTAINABLY
SOURCED CLOTHING, CREATING
A LEGACY OF CREATIVITY!

OUR MISSION

Vintage Thrivals is an innovative vintage clothing company that aims to drastically reduce the waste created by fast fashion companies, create more space in fashion for the celebration of all bodies, and presentations, while ushering in a new ecosystem that keeps wearable art accessible to all people!

Our brand exists in a space between retail and reverence. Vintage Thrivals celebrates the creativity of the 80s, the freshness of the 90s, and the coolness of today through the creation of one-of-a-kind wearable art pieces made from sustainably sourced clothing. Our brand's identity is based on three principles:

1. Sustainability.
2. Inclusivity
3. Self expression

We truly believe in creating art, for people to wear as well as art that is made to be exhibited. A major part of the Vintage Thrivals legacy is woven into how we are changing the way people are digesting fashion. Instead of presenting our pieces on a traditional runway, we have pioneered "presentations" that alter the way the materials are seen by audiences.

(PHILADELPHIA, PA)

OUR INITIATIVES

SHOP & DROP POP-UPS

One of the founding principles of Vintage Thrivals is the practice of sustainability. Which created the SHOP and DROP initiative! A pop up shop where patrons can shop the latest from Vintage Thrivals as well as donate unwanted clothing!

With the SHOP and DROP initiative, we plan to create a new ecosystem within the community. Our aim to see less clothing going to landfills, or being blindly donated to centers, where we don't get to see the direct impact. The items donated during the SHOP and DROP will be sorted, and what is not used to create new pieces for Vintage Thrivals will be donated directly to community impact entities and resource groups to make sure that items are getting to the persons who need them.

Our projection is to create quarterly SHOP and DROP pop ups throughout the year, partnering with local business to also stimulate their spaces. To activate the partnering businesses we also offer discounts to patrons who make purchases with the partnering venue/business. We are aiming to reduce the waste created by clothing in landfills, raise community awareness, and continue to keep fashion fun, and accessible to all people.

DINNER WITH DESIGNERS

Dinner with Designers is a traveling event series created by the minds inside Vintage Thrivals. This experience celebrates the work of regionally based designers, and culinary creators. A merger of the fine arts that comprise food and fashion are sure to entice any enthusiast of either medium.

This event encompasses unique presentations from the featured designers, that go beyond the regularity of a normal runway show. Panel discussions, Audience Q&A, and a beautiful dinner for the patrons. The focus is provide a comfortable space for fashion and food enthusiast to shop, share space with creators, and enjoy an evening of all their favorite things!

We would love to continue to expand the legacy of Dinner with Designers by bringing this experience to your city!

ROCKET Labs

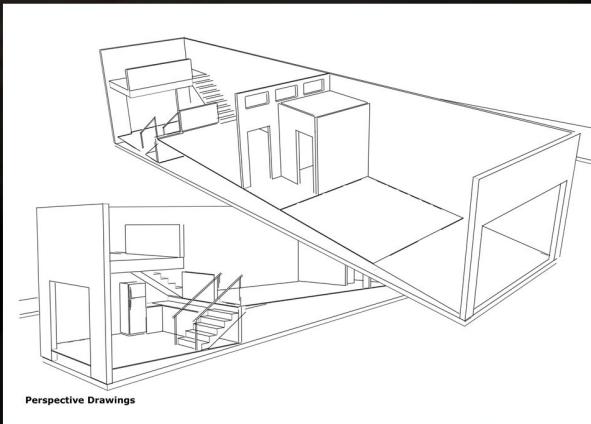

BUILDING A LEGACY OF CREATIVITY IN BALTIMORE CITY

Rocket Labs wants to be the turning point of access to creativity and creative careers for the people of Baltimore City and beyond!

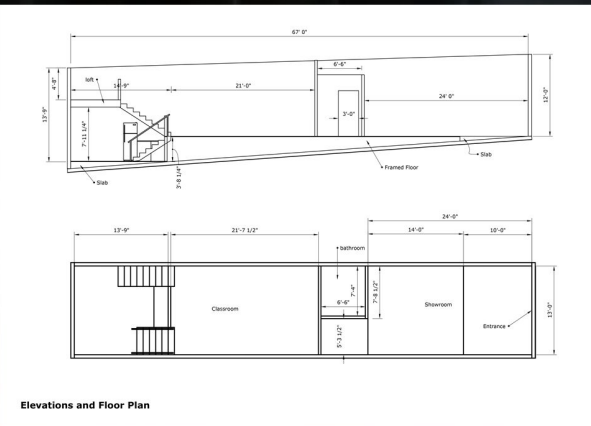

Rocket Labs would be home to several creative entities that work with small businesses and creators in the city and surrounding areas! Primarily housing Vintage Thrivals, an innovative sustainability-based clothing company that takes discarded clothing and turns them into 1 of 1 wearable pieces, combating the creation of waste made by fast fashion companies. As a home to Vintage Thrivals, not only will patrons be able to shop the available pieces, but they can also donate used clothing to be used to create pieces or be given to local impact groups that the space will partner with to make sure the communities in need are serviced directly.

Also inside, Rocket Labs will be home to the Rich Rocket Media Content Studio and classroom, where local creators can come and collaborate, create, and explore new ways to make content. Creative professionals can teach valuable skills to community members and patrons, giving the community access to new creative tools! This classroom will also be used to connect the city's youth to creative career paths, as we plan to partner with local educators to create programming that will allow students to expand their creative reach within the space!

This space will be a part of the revitalization of Baltimore's creative culture and be a mainstay in the legacy of the artists that captivate the world and call Baltimore home! We need your help to realize the full potential of this piece of history!
